

Advanced Manufacturing

With its central location, the Mohawk Valley is a natural hub for manufacturing and it has had a home in the region for over two centuries.

From the founding of Remington Arms and Revere Copper Products almost two centuries ago to the advanced metallurgy found today at Special Metals Corporation, HMI Metal Powders and others, the Mohawk Valley has been at the forefront of this industry. The Mohawk Valley is also home to over 30 advanced machine shops, which produce precision components that serve a vital role in much larger industrial machines. Manufacturing in this region is not limited to industrial machining and metallurgy, it is also home to others including the oldest manufacturer of residential and commercial furnishings; Harden Furniture and a producer of Major League Baseball bats; Rawlings Sporting Goods.
